

## Commitment #10

### Ministry in charge of Disaster Management to identify, prepare, implement and monitor disaster management activities in a participatory manner

1<sup>st</sup> March 2019– 31<sup>st</sup> August 2021

Lead implementing agency/actor	<b>Ministry in charge of Disaster Management; Disaster Management Centre</b>
<b>Commitment description</b>	
What is the public problem that the commitment will address?	Sri Lanka's weather and climate patterns have undergone significant changes since recent times and frequent disasters such as heavy rainfall, floods, landslides, droughts and lightning have increased. A considerable number of people, particularly from less affluent sections of the population, are adversely affected repeatedly by these natural disasters mainly due to inadequate preparedness at the ground level. Hazardous situations, life losses, and damage to property and infrastructure due to natural disasters have increased in the recent past. Increased vulnerability to disasters has imposed a considerable economic and social burden on citizens and a strain on relief and financial aid being provided.
What is the commitment?	The Ministry in charge of disaster management and the Disaster Management Centre will engage with communities, affected persons and other stakeholders to identify needs, review the existing disaster preparedness plans, and prepare disaster management guidelines. Training will be provided to stakeholders on the implementation of the guidelines. Communities will also be engaged in the preparation of Disaster Preparedness Plans at District, Divisional and Grama Niladhari Division level. A system will be established to disseminate early warning messages. Community leaders will be provided early warning messages through SMS to be conveyed to rest of the community. Each Ministry will also undertake to prepare a comprehensive Disaster Preparedness Programme including Government response mechanism based on the District, Divisional and Grama Niladhari Division plans.
How will the commitment contribute to solve the public problem?	This commitment will enhance national readiness and capacity of communities to respond to natural disasters through the implementation of comprehensive disaster preparedness plans, disaster management guidelines and early warning systems. Hazardous situations, life losses, and damage to property and infrastructure due to disasters can be minimized thus reducing the burden of disaster impacts and communities and the government. Overall, community involvement in identification, preparation, implementation and monitoring of disaster mitigation actions will be an important factor in increasing the effectiveness of disaster management action and reducing the burden on citizens.
Why is this commitment relevant to OGP values?	This commitment promotes <b>public participation</b> as citizens are and provided opportunity to give inputs on crucial aspects that affect their lives and are also made to participate in the implementation of the plans. It also promotes access to information by the citizens.

Additional information		This commitment strengthens and promotes the implementation of the Disaster Management Act of 2005; the recommendations and commitments in the Draft Sustainable Sri Lanka: Vision & Strategic Path and the Vision 2025; targets for disaster prevention and resilience in crosscutting Sustainable Development Goals.	
Milestone Activity with a verifiable deliverable		Start Date:	End Date:
1. Disaster Management Centre (DMC) will review the existing preparedness plans through a consultative process including affected parties, CBOs and other stakeholders.		April 2019	September 2020
2. DMC will facilitate community and stakeholders to prepare Disaster Preparedness Plans at District, Divisional and Grama Niladhari Division levels.		October 2019	June 2020
3. Disaster management guidelines will be prepared through a consultative process with marginalized/ vulnerable groups. Consultative meetings will be held with all stakeholders to identify the needs. The guidelines will be disseminated and training on the implementation of the guidelines will be provided to stakeholders.		April 2019	November 2020
4. A system is established to effectively disseminate early warning messages to grass-root level communities. Early warning messages will be relayed via SMS to identified community leaders to be conveyed to other community members in the area.		October 2019	June 2020
5. Based on the District Divisional and GN plans, a comprehensive Disaster Preparedness Programme including a government response mechanism is developed by each Ministry.		July 2020	November 2020
